Human Development Over Time

Brynjolfsson (2016), The Second Machine Age

Supercomputer Power (FLOPS)

Our World
in Data

The growth of supercomputer power, measured as the number of floating-point operations carried out per second (FLOPS) by the largest supercomputer in any given year. (FLOPS) is a measure of calculations per second for floating-point operations. Floating-point operations are needed for very large or very small real numbers, or computations that require a large dynamic range. It is therefore a more accurate measured than simply instructions per second.

The global shift to a **future of work** is defined by an **ever-expanding cohort of new technologies**, by new sectors and markets, by global economic systems that are **more interconnected** than in any other point in history, and by **information that travels fast** and spreads wide.

“Machines will be capable, within twenty years, of doing any work a man can do, and hence that new technologies would **make many jobs obsolete**” (Ernst et al., 2019)

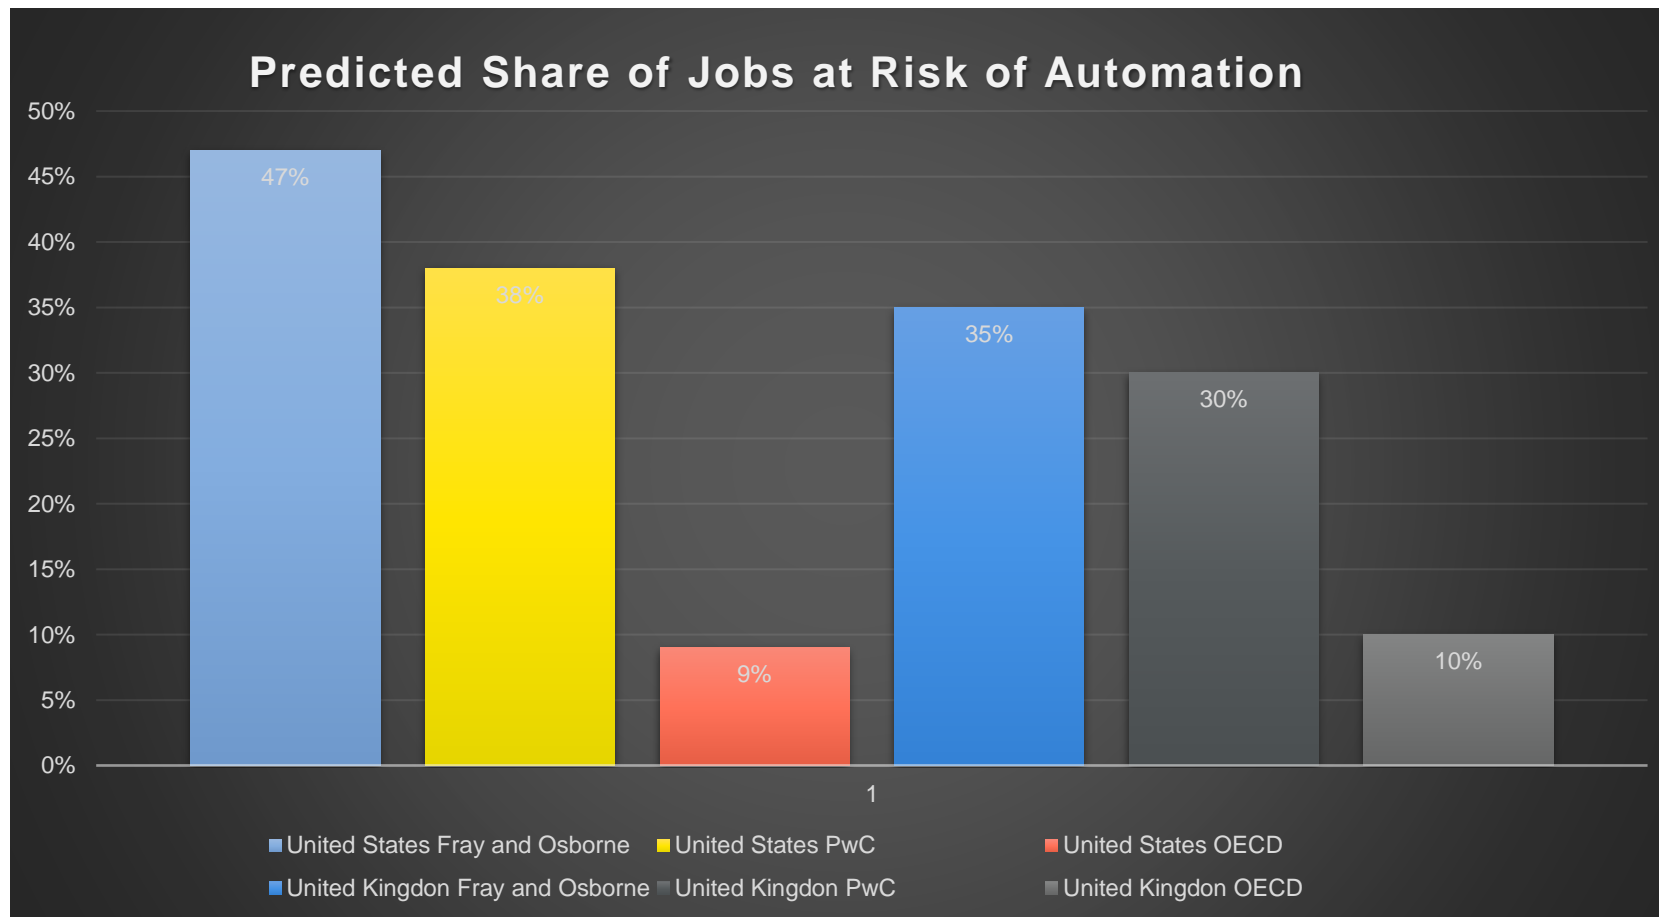

“Automation and digitalization are unlikely to destroy large numbers of jobs. However, **low qualified workers** are likely to bear the brunt of the adjustment costs as the automatability” (OECD, 2016)

“High-speed **mobile internet; artificial intelligence**; widespread adoption of **big data** analytics; and cloud technology—are set to dominate the 2018–2022 period as drivers positively affecting business growth” (WEF, 2018)

“The **nature of work** will change, and millions of people will **require new skills.**” (McKinsey, 2013)

Predicted Share of Jobs at Risk of Automation

Jobs Lost and Jobs Gained

 **Google DeepMind**
Challenge Match
8 - 15 March 2016

 **AlphaGo**

A New and Redundant Roles

New Roles	Redundant Roles	
Data Analysts and Scientists	Data Entry Clerks	
AI and Machine Learning Specialists	Accounting, Bookkeeping and Payroll Clerks	
General and Operations Managers	Administrative and Executive Secretaries	
Big Data Specialists	Assembly and Factory Workers	
Digital Transformation Specialists	Client Information and Customer Service Workers	
Sales and Marketing Professionals	Business Services and Administration Managers	

Jobs of the future

- **Data Analysts** and Scientists
- AI and **Machine Learning** Specialists
- **Big Data** Specialists Digital
- **Digital Transformation** Specialists
- Software and **Applications Developers** and Analysts
- Process **Automation** Specialists
- **Information Security** Analysts
- **Training** and Development Specialist

Jobs of the future II

Technology

- Machine-Learning Developer
- Robot Ethicist
- Gamification Designer
- Quantum Computer Programmer
- Ethical Hacker

People

- AI Educator
- Cyborg Psychologist
- Lifelong Education Advisor
- Nostalgist

Data

- Data Farmer
- Data Waste Recycler
- Data Commodities Broker

Business

- Trendwatcher
- AI Intellectual Property Negotiator
- Chief Ethics Officer

Skills Demand

- Technology design and prog
- Analytical thinking and innovation
- Active learning and learning strategies
- Creativity, originality and initiative
- Critical thinking and analysis
- Complex problem-solving
- Leadership and social influence
- Emotional intelligence

Digital Transformation in Romania

(Eurostat, 2019)

Share of workforce in Brain Business Jobs

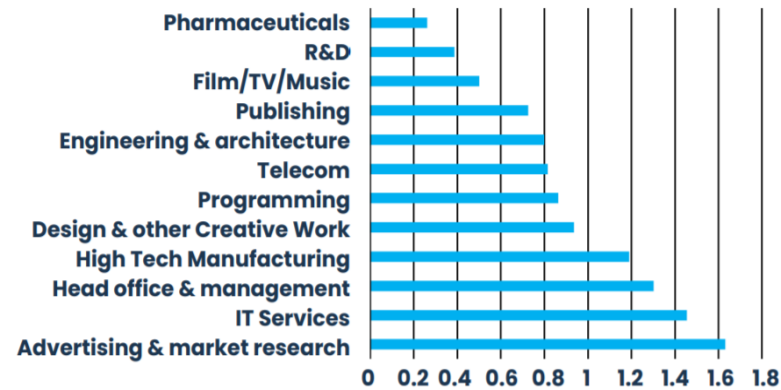

Share of workforce in Brain Business Jobs

Hungary

Slovakia

Romania

* 1 = EU average

(ECEPER, 2021)

Hungary

- Compared to the rest of Europe, Hungary is a **top performer** when it comes to high-tech manufacturing.

Slovakia

- The main strength is in **IT-services**, followed by **advertising & market research** and **high-tech** manufacturing. Head office & management is also a strength.

Romania

- **600,000 jobs** will be impacted by the new technologies in Romania. The jobs could contribute to an increase of local Gross Domestic Product (GDP) up to **\$66 billion** by 2029” PwC.
- 99 700 new Brain Business Jobs, **64% have been created in ICT**. The main **strength** is in **telecom**, followed by **high-tech manufacturing** and IT services (ECEPR 2019).

Adult Participation in Lifelong Learning

(Eurostat, 2018)

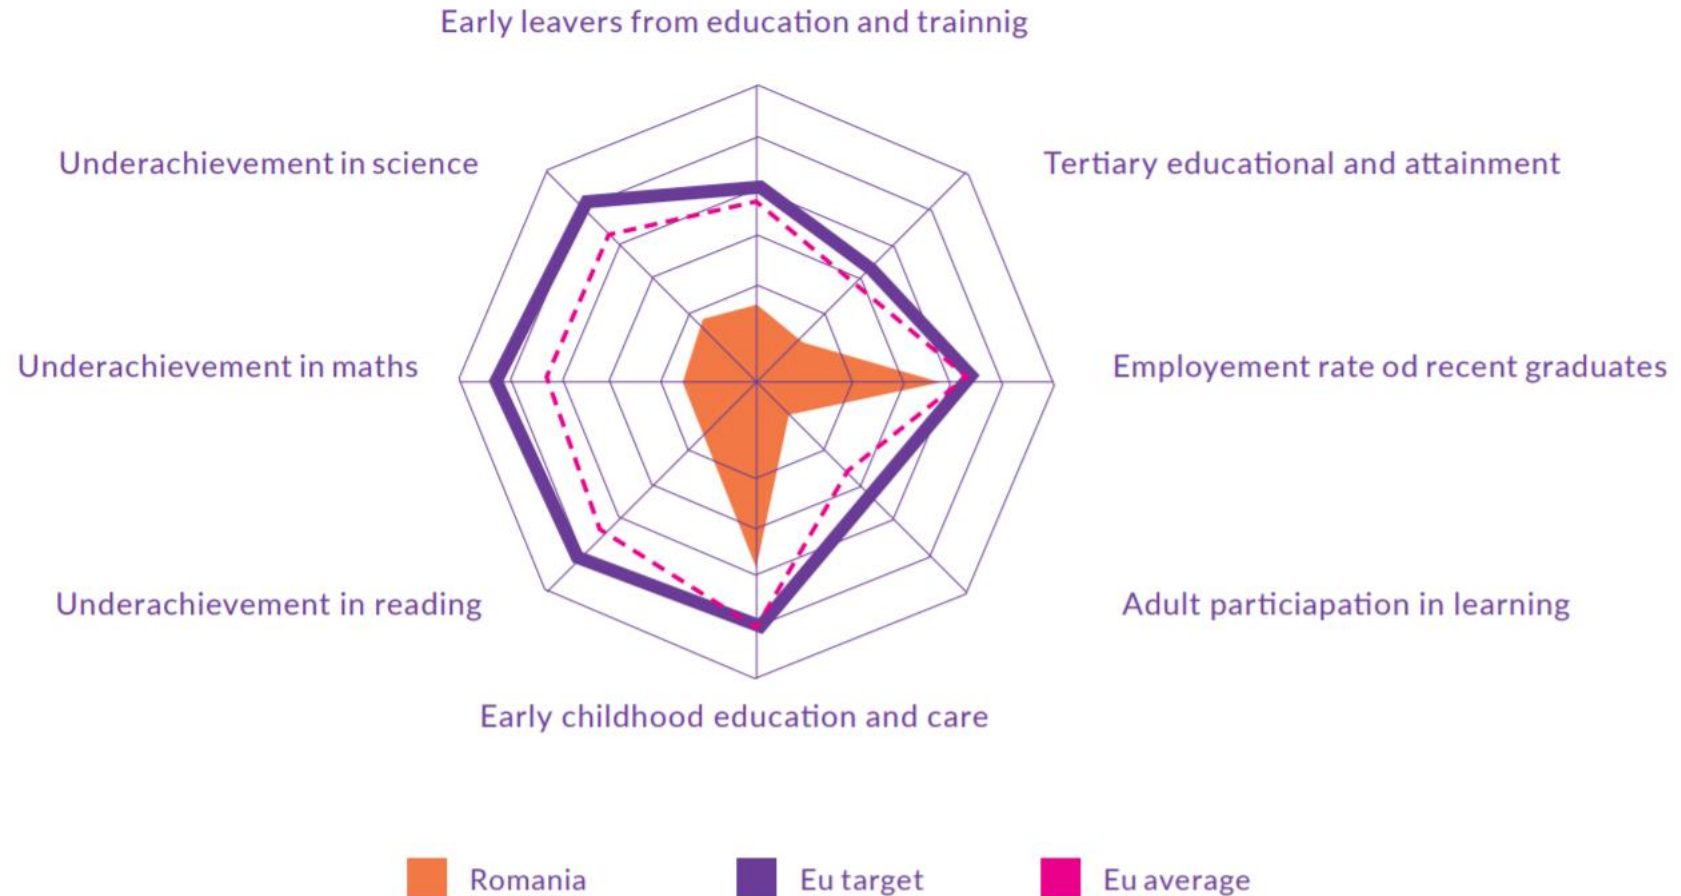

Share of Young People with Basic Digital Skills

(Eurostat, 2019)

Adult Learning Strategies

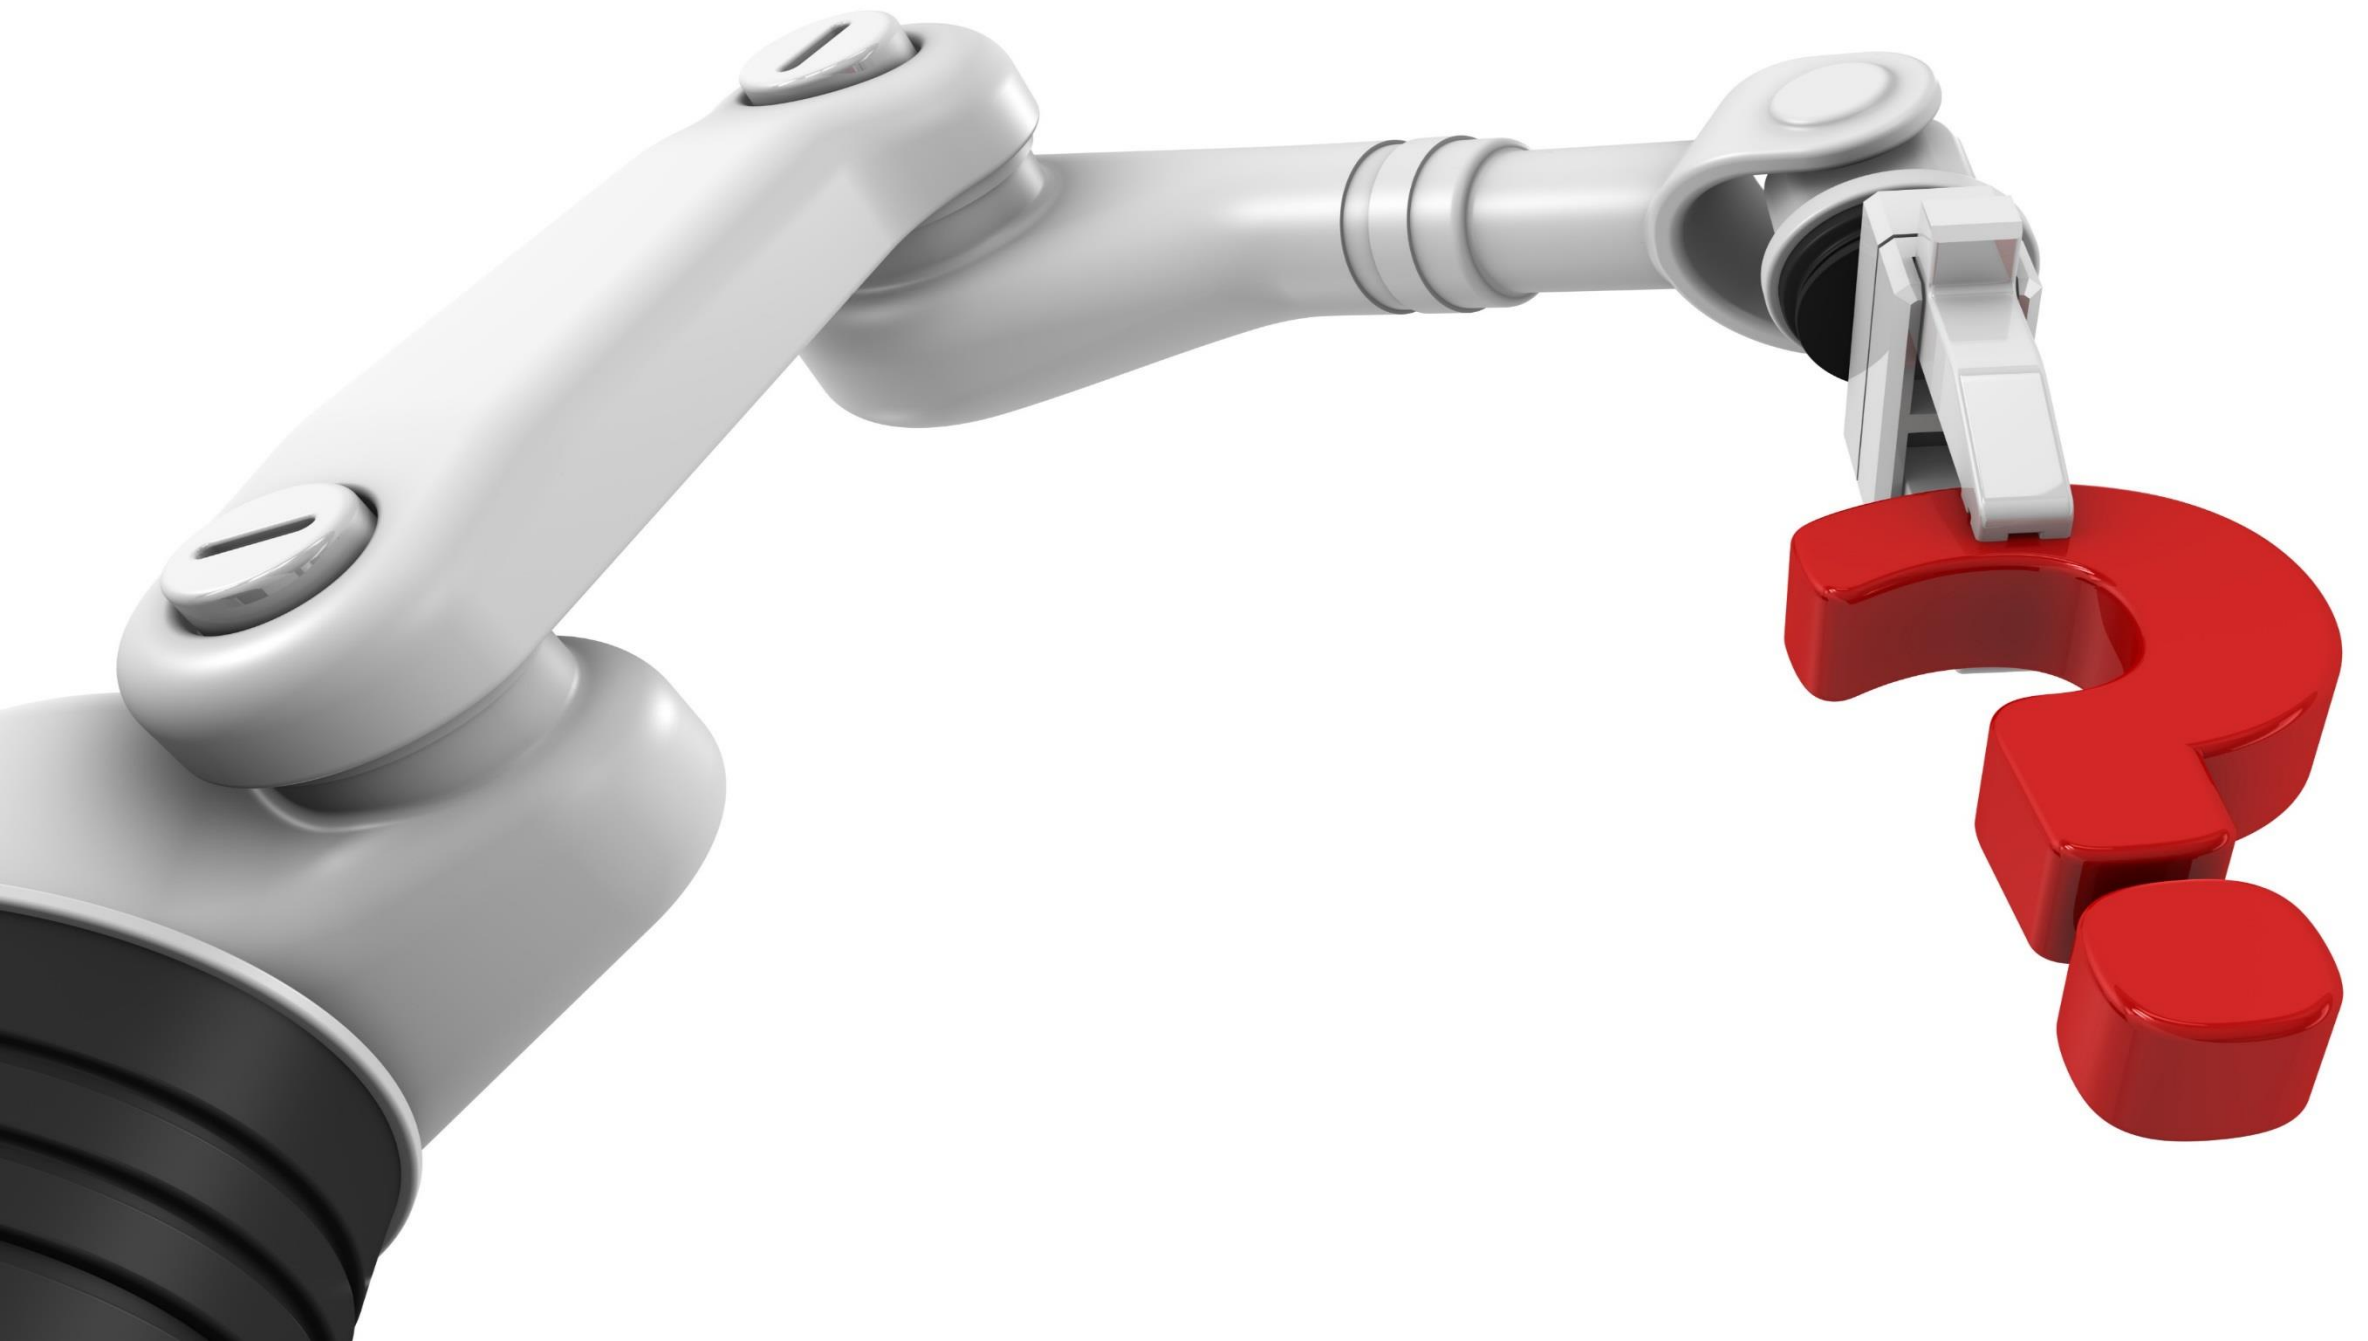

(Erasmus, 2019)

The minute that you're not
learning I believe you're dead.
